

Seeking Sr. Configuration Management Professionals

U. S. Citizenship and Department of Defense Secret Clearance eligibility are required

Transformation Systems, Inc.

TSI is a fast growth management systems engineering company of possibility thinkers helping leaders achieve their challenging enterprise transformation goals. Delivering proven solutions with a blend of expertise in industrial engineering, organizational psychology and applied science, TSI's consultants drive measurable individual, group, and organizational improvement. Agency capability and readiness expand as a result of TSI's integration of project management, relationship management and knowledge management. Receiving numerous accolades for helping set historic records in the counter-IED effort and for facilitating successful large-scale technology transitions, TSI is a company that executives call to increase productivity, efficiency, effectiveness and responsiveness.

Sr. Configuration Management Analyst – Support Senior Logisticians and Engineers with the design, development and application of enterprise solutions in configuration management for the successful implementation of plans, initiatives and metrics for our Department of Defense clientele.

- Write, review and revise configuration management plans and policies.
- Support the conduct of Functional and Physical Configuration Audits.
- Maintain, update, and support the use of configuration management data in USMC databases.
- Analyze configuration management processes for the identification, design and implementation of improvement initiatives.
- Conduct in-depth analysis and develop metrics to monitor key phases of the configuration management process.
- Maintain and update a repository of ECPs and Deviations.
- Analyze technical documentation, plans and policies for configuration management implications.
- Assist in the identification and mitigation of configuration management risks.
- Provide advanced support in configuration project management, meeting management, and implementation support.
- Collect, analyze and portray data from various internal and external sources.
- Generate high quality technical reports, metrics, briefs, white papers, and presentations as assigned.

Successful candidates will have:

- At least 5 years relevant professional experience.
- Bachelor's Degree from an accredited college or university.
- DoD Secret security clearance.
- Demonstrated experience in the application of configuration management principles and procedures.
- Experience supporting USMC programs.
- Experience with MEARS, CM Pro, and Windchill highly preferred.
- Superior written and oral communication skills.
- Strong interpersonal, analytical and problem-solving skills; the ability to define solutions and implement a complex deliverable.

TSI offers a very competitive compensation and benefits program. Please apply at www.transformationsystems.com or email your resume, security clearance status and compensation requirements to jobs@transformationsystems.com.
